## Hard Enamel Pins

Hard enamel pins, sometimes called epola pins, imitation cloisonne pins or die struck pins with hard enamel, is a kind of craftwork for the lapel pins. Hard enamel pins are best high-quality enamel pins, have a durable and long-lasting appearance.

## Soft Enamel Pins

Soft enamel pins (also known as 'embossed enamel pins') are low-cost and top quality die struck pins with raised metal and recessed enamel, which is filled in enamel color by hand.

Hard Enamel Pins  
VS  
Soft Enamel Pins

### Why Hard Enamel Lapel Pins?

They are flat and smooth.

They like simple design, which works well.

They look more expensive.

They use shiny plating.

### Why Soft Enamel Lapel Pins?

They have raised metal edges.

They like more intricate design.

They look more cheaper.

They can use any plating or dyeing crafts.

# Product technology

## Sandblast Pins

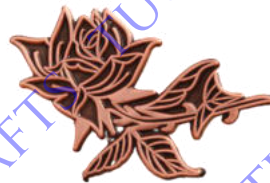

Sandblast pins are high-quality metal pins and exactly like hard enamel pins or soft enamel pins, except without the color and sandblast background! This un-colored die struck sandblast pins provide classic and timeless beauty to create custom lapel pins that work for any occasion. The raised areas are high polished to have a shiny glossy look while recessed areas have matte textured or sandblasting that adds a great contrast.

## Custom 3D or Cutout Pins

If you are thinking about adding multi-levels of the surface at multiple angles, the 3D pin is an ideal choice, which creates a 3-dimensional look and feel.

3D lapel pins will be suitable for complex design. Custom 3D Pins are often used for the design like statues, animals, architectural replicas, and human faces.

## Antique Pins

Antique Pins also called vintage lapel pins are great contemporary look with old-world charm, each antique pin is plated with an antique finish of your choice and then the recessed areas stay dark while the dark raised areas are polished to a lighter tone of metal. Vintage pins due to the antique brooch styles so that very suitable use for vintage motorcycle pins, vintage cat pins, vintage hat pins.

# Product technology

## Offset Printed Pins

Offset printed pins (also known as screenprint, silkscreen, photo screen, or photo-etched) give you the maximum flexibility in design and style without altering or distorting your design.

Because we use offset printing and laser printing technology, the complete text, and patterns printed on the pins, the overall visual gives us brilliant color and clarity. The high-resolution graphics print perfectly on your custom lapel pins.
